

Rates photography: wedding & engagement

To me photographing a wedding is telling the story in images of the most important day of your life. It won't be just the formal side of the day. It's about capturing those emotional, warm, funny or even hilarious moments and details.

I combine journalistic photography, with formal photography and mix black/white photography with color.

1. Engagement session 499.00*

The session fee is included. You pick the location. You'll receive all the photos on a CD, mixed color and B/W.

2. Rehearsal free

I like to be at the rehearsal to check lighting and good locations in church, at the reception. The church rehearsal is very important for me: what are good angles, where am I allowed to go, can I use flash, how is the natural light from the windows.

3. Getting ready 349.00*

It's my experience that during 'getting ready' I can catch that very special moment of for example the mom of the bride helping with the wedding dress or her hair or dad helping his girl in the car.

4. Ceremony 795.00*

I'll catch those important moments during the ceremony! The vows, the praying, the ring, THE KISS! Let's not forget the emotions on the faces of your parents, and you leaving church as husband and wife for the very first time.

5. Formal 795.00*

With my style of photography even the formal part will have a casual touch. Journalistic photography is the ideal way to put people at ease. I want everybody to have fun, and the photos will reflect that.

6. Reception 895.00*

'Ignore the camera' are the key words. Emotional moments during daddy's speech when he's talking about his little girl, hilarious moments during the best man's speech, the guest enjoying their dinner, the first dance, those cute little kids, details like the bouquets at the table, everybody just enjoying themselves. I'll catch it all!
